                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 9, 7

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 23, P

Sequence 12, Application US/09748960

Sequence 12, Application US/09748960

Patent No. US20010046496A1

GENERAL INFORMATION:
APPLICANT: Brettman, Lee R.
APPLICANT: Allieon, David Edward
ITILE OF INVENTION: Method of Administering an Antibody
FILE REFERENCE: 1855.2007-001

CURRENT APPLICATION NUMBER: US/09/748,960

CURRENT APPLICATION NUMBER: US/09/748,960

CURRENT APPLICATION NUMBER: US/09/550,082

PRIOR PRILOK DATE: 2000-10-17

PRIOR FILING DATE: 2000-14-14

SOFTWARE: Fact SEQ ID NOS: 14

SOFTWARE: Fact SEQ for Windows Version 4.0

SEQ ID NO 12

ILENGTH: STATE: BTT

ORGANISM: Mus musculus
FEATURE:
NAME/REY: SITE

LOCATION: (1) ... (5)

OTHER INFORMATION: CDRI of the heavy chain of antibodies Act-1 and US-09-748-960-12
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ö

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     셤
                                                                                                                                                                                                                                                                                                                                   Sequence 3, Application US/08318970B
Patent No. 5589573
GENERAL INFORMATION:
PAPLICANT: Hideaki HAGIWARA, et al.
TITLE OF INVENTION: AMINO ACID SEQUENCES OF ANTI-IDIOTYPIC
TITLE OF INVENTION: ANTIBODIES AGAINST ANTI-CANCER HUMAN MONOCLONAL
TITLE OF INVENTION: AND DNA BASE SEQUENCES ENCODING THOSE SEQUENCES
NUMBER OF SEQUENCES: 48
CORRESPONDENCE ADDRESS:
ADDRESSEE: Law Office of Sherman and Shalloway

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 62,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 36, Application US/09424840

patent No. 6790338

GENERAL INFORMATION:
APPLICANT: BERCHTOLD, Peter
APPLICANT: ESCHER, Robert F.A.
TITLE OF INVENTION: ARL1-GPIB/IIIA Recombinant Antibodies
FILE REFERENCE: 100564-09039

CURRENT FILING DATE: 1999-12-03

PRIOR PILING DATE: 1997-06-06

PRIOR FILING DATE: 1997-06-06

PRIOR FILING DATE: 1997-06-06

PRIOR FILING DATE: 1998-05-08

PRIOR FILING DATE: 1998-05-08

PRIOR FILING DATE: 1998-05-08

SOFTWARE: PRIOR APPLICATION NUMBER: DE 1975227.7
